

Horns

Cone & ice cream

Attach the horns and the big ice cream cone.

Attach the back compartment.

**NOTE:**

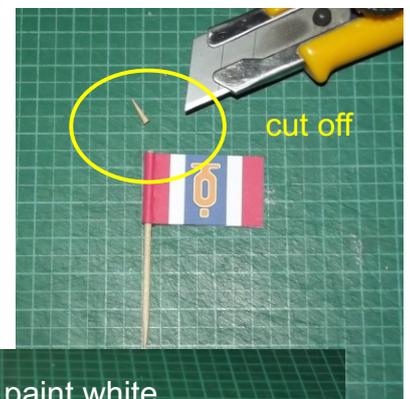

Depending on the thickness of paper and card used the back compartment may not be flush with the rear of the ground plate. This is not a problem and will not show to the average eye. Do not force the pieces together to be flush; you may crush them by doing so. However, if there are any white spots showing on the bottom of the compartment use the coloured piece "A" to hide them. Cut it to shape and glue it over the visible areas.

**Rail**

Laminate parts r1 (front) and r3 (back) and r2 (front and back) to cardboard and attach to the cargo room. Refer to the info on the parts page to know how thick the completed rail has to be. Paint the edges.

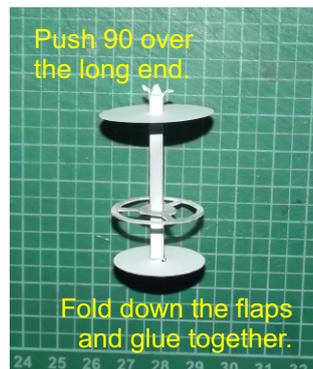

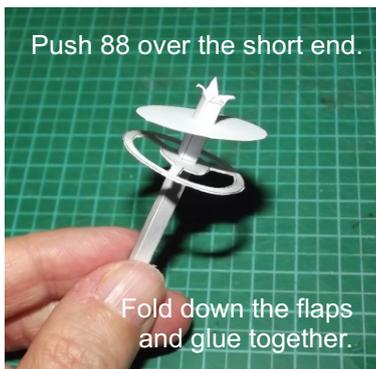

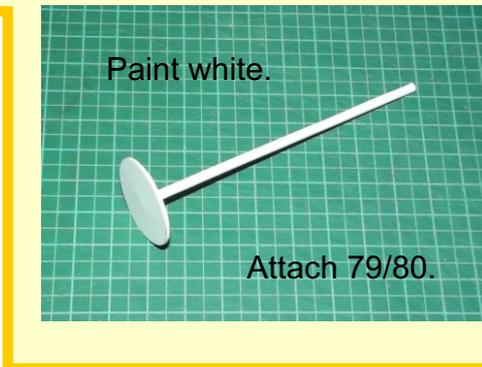

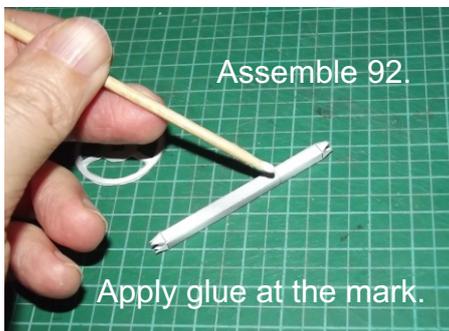

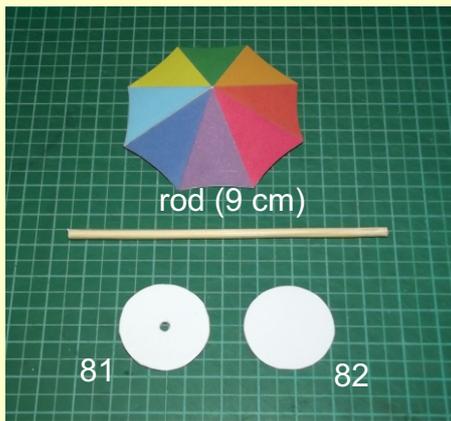

**Accessories**

**Caprican flag**

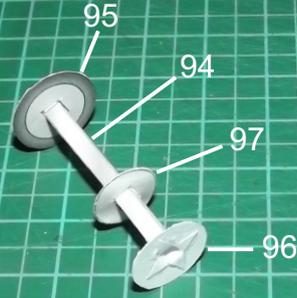

## Chairs (2x)

Laminate the two pieces  
97 back to back.

Attach 95 & 96 like 88 & 90.

Laminate 95 & 96

to card and attach.

ice1

ice2

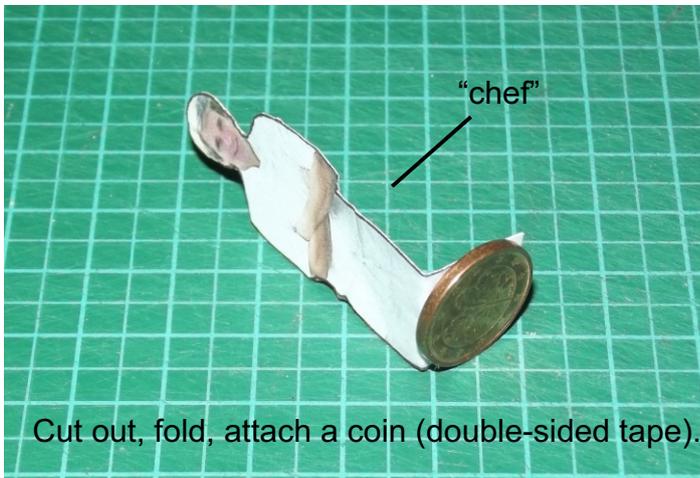

Fold up the flaps.  
Glue the respective pieces back to back.  
Attach double-sided tape to the bottom.

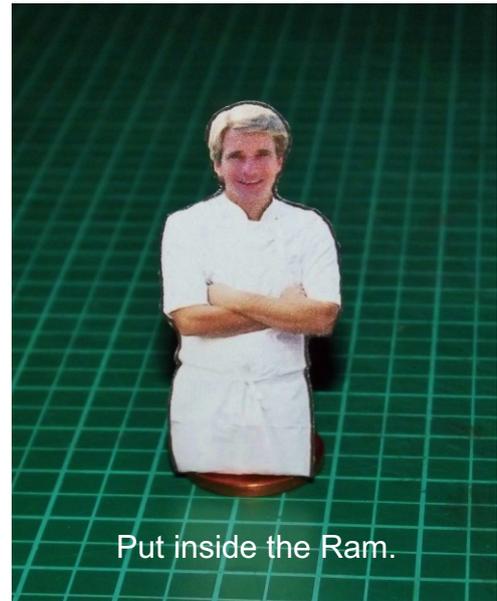

Put them on the table or  
inside the Ram.

## Ice and drinks

## “Chef”

Cut out, fold, attach a coin (double-sided tape).

Put inside the Ram.

You can display your Ram with or without the side panel. The notch holds it in place securely.

The awning can be moved up and down.
